Better viewing experience at: **https://rahul-portfolio-main.vercel.app/**

I am a Software Engineer and Data Engineer with a solid grasp of development processes, skilled in **Python**, **React**, **TypeScript**, and **Java**. I focus on writing clean, efficient code and building reliable, scalable solutions. With experience across both data engineering and software development, I aim to create practical, impactful products.

EXPERIENCE

FULLSTACK ENGINEER

Cognizant Technology Solutions

12/2024 – Present

- Built and deployed AI-driven products for **GovTech** and **MDDI** supporting nationwide digital transformation.
- Fullstack development using **React** (**TypeScript**) & **Python Django** stack
- Drag and drop interfaces with dynamic charting and visualisation developed on React.
- Rolled out products across **Whole-of-Government (WOG)** infrastructure, ensuring compliance with security protocols and regulatory standards.

LEAD SOFTWARE ENGINEER

Uniad Pte Ltd.

06/2024 – 12/2024

- Developed an Enterprise Solution for tuition centre
- Helped maintain the community app with over **10,000 users**
- Configured CI/CD pipelines to automate deployments, testing and versioning
- **RDMS** design from scratch for the Enterprise Solution.
- **React** (Front end) + **Python** (Backend) + PostgreSQL (Database)
- Video call implementation with calendar sync across users.
- **Payment Gateway** implementation with virtual bank accounts

SOFTWARE ENGINEER

EtaVolt Pte Ltd

08/2023 – 06/2024

- Led full stack development of a **customer acquisition** platform that increased efficiency by **150%** and transformed the company's product offerings.
- Completed 2 successful software development cycles with **React**, **ThreeJS**, and **Python**, resulting in a **3D modelling software** for mesh using point cloud and **LiDAR** data.

DATA ENGINEER

Software & Simulation Technology (S2T)

06/2021 – 06/2023

- Designed and developed scalable **microservices** architecture using **Python**, **Docker**, and **Kubernetes**, increasing system uptime by **200%** and reducing latency by **50%**.
- Developed high-performance in-house APIs using **Flask** and **FastAPI**, handling over **10,000 requests** per second.
- Migrated and optimized **C++ legacy codes**, achieving a **300%** performance improvement with **Python**.
- Implemented **cloud services** using Azure Web Services and AWS, including serverless computing, storage, and database services.

EDUCATION

BACHELOR OF SCIENCE (HONORS)

University Of London (Goldsmith)
Computing & Information Technologies

2018 - 2021

DIPLOMA

Ngee Ann Polytechnic
Marine & Offshore Technologies

2012 - 2015

EXPERTISE

Proficient in: Java, Python, HTML, CSS, React, ThreeJS

Deployments: Linux, Docker, Kubernetes, Portainer, Swarm

RDBMS: Elasticsearch, MySQL, Mongo DB, PostgreSQL, SQLite, SQL, Redis

Cloud services proficiency: Azure, AWS, Google Cloud
